SUBJECT and TITLE INDEX

POLYMER ENGINEERING AND SCIENCE
VOLUME 12
1972

A

1. ABS

Characterization of Polymer Composites by Electron Microprobe Analysis, S. S. Labana, H. K. Plummer and W. J. Burlant, *January, p. 34*
Deep Drawability of Biaxially Rolled Thermoplastic Sheets, L. J. Broutman, S. Kalpakjian and J. Chawla, *March, p. 150*
Cold Rolled ABS. Part I: The Effect of Rubber Particle Size on the Tensile Properties of ABS Before and After Cold Rolling, M. R. Grancio, *May, p. 213*
Some Aspects of Orientation in Injection Molded Objects, J. L. S. Wales, Ir. J. Van Leeuwen and R. Van Der Vijgh, *September, p. 358*
Cold Rolled ABS. Part 2: Rubber Morphology and Tensile Properties of Hot Stretched and Cold Rolled ABS, M. R. Grancio, A. A. Bibeau and G. C. Claver, *November, p. 450*
The Bending of Polymers Under Tension as Related to a Deep Drawing Process, W. B. Buettner, D. I. Marshall and J. A. Manson, *November, p. 409*

2. Acrylic

Converging Flow of Polymer Melts in Extrusion Dies, F. N. Cogswell, *January, p. 64*
Characterization of Lubricants for Polyvinyl Chloride, L. F. King and F. Noel, *March, p. 112*

3. Additives

Surface and Interfacial Tension of Polymer Liquids—A Review, G. L. Gaines, Jr., *January, p. 1*
The Effectiveness of Polymer Additives as Determined by Torsional Braid Analysis, B. L. Williams. *July, p. 282*

4. Antioxidants

The Effectiveness of Polymer Additives as Determined by Torsional Braid Analysis, B. L. Williams, *July, p. 282*

B

5. Bending

The Bending of Polymers Under Tension as Related to a Deep Drawing Process, W. B. Buettner, D. I. Marshall and J. A. Manson, *November, p. 409*

6. Biaxial Orientation

Deep Drawability of Biaxially Rolled Thermoplastic Sheets, L. J. Broutman, S. Kalpakjian and J. Chawla, *March, p. 150*

7. Birefringence

Some Aspects of Orientation in Injection Molded Objects, J. L. S. Wales, Ir. J. Van Leeuwen and R. Van Der Vijgh, *September, p. 358*

8. Branching

Characterization of Polyvinyl Chloride. Part III. An Alternative GPC Method for Measuring the Radii of Gyration, and the Degree of Long-Chain Branching of Polydispersed Polymers, R. K. S. Chan and C. Worman, *November, p. 437*

C

9. Chlorination

Structure-Property Relationships of Chlorinated Polyethylenes, N. K. Kalfoglou and H. L. Williams, *May, p. 224*

10. Cold Rolling

Deep Drawability of Biaxially Rolled Thermoplastic Sheets, L. J. Broutman, S. Kalpakjian and J. Chawla, *March, p. 150*
Cold Rolled ABS. Part I: The Effect of Rubber Particle Size on the Tensile Properties of ABS Before and After Cold Rolling, M. R. Grancio, *May, p. 213*
Dimensional Recovery of Cold-Rolled Polycarbonate, K. C. Rusch, *July, p. 288*
Cold Rolled ABS. Part 2: Rubber Morphology and Tensile Properties of Hot Stretched and Cold Rolled ABS, M. R. Grancio, A. A. Bibeau and G. C. Claver, *November, p. 450*

11. Composite

Weathering of Fibre Reinforced Plastics. Progress of Debonding Detected in Model Systems by Using Fibres as Light Pipes, S. Y. Field and K. H. G. Ashbee, *January, p. 30*
Characterization of Polymer Composites by Electron Microprobe Analysis, S. S. Labana, H. K. Plummer and W. J. Burlant, *January, p. 34*
Strength of Short-Fiber Reinforced Composites, R. E. Lavengood, *January, p. 48*
Weathering Study of Glass-Fiber Reinforced Polyester Sheets by Scanning Electron Microscopy, A. Blaga, *January, p. 53*
Mechanical Properties of Particulate Composites, S. Sahu and L. J. Broutman, *March, p. 91*

12. Cooling

Some Factors Influencing Cooling Rates of Rotationally Molded Parts, J. L. Throne, *September, p. 335*

13. Copolymer

Low Temperature Dynamic Mechanical Properties of Polyurethane-Polyether Block Copolymers, J. L. Illinger, N. S. Schneider and F. E. Karasz, *January, p. 25*

14. Crazing

The Bending of Polymers Under Tension as Related to a Deep Drawing Process, W. B. Buettner, D. I. Marshall and J. A. Manson, *November, p. 409*

15. Creep

Strain Ratio and Volume Change During Tension and Compression Creep of Thermoplastics, P. J. Mallon, D. McCammond, and P. P. Benham, *November, p. 420*

16. Crystallinity

Melting Rates of Crystalline Polymers Under Shear Conditions, D. W. Sundstrom and C.-C. Young, *January, p. 59*
Thermal Conductivity of Polyethylene: The Effects of Crystal Size, Density and Orientation on the Thermal Conductivity, D. Hansen and G. A. Bernier, *May, p. 204*
Structure-Property Relationships of Chlorinated Polyethylenes, N. K. Kalfoglou and H. L. Williams, *May, p. 224*

17. Crystallization

Thermal Conductivity of Polyethylene: The Effects of Crystal Size, Density and Orientation on the Thermal Conductivity, D. Hansen and G. A. Bernier, *May, p. 204*

18. Cure

Determination of Cure of Diallyl Phthalate Using Differential Scanning Calorimetry, P. E. Willard, *March, p. 120*

D

19. Debonding

Weathering of Fibre Reinforced Plastics. Progress of Debonding Detected in Model Systems by Using Fibres as Light Pipes, S. Y. Field and K. H. G. Ashbee, *January, p. 30*

20. Deformation

Breaking Energies of a Nylon Series Subjected to High-Speed Transverse Impact, A. F. Wilde, J. J. Ricca and J. M. Rogers, *January, p. 41*
Dimensional Recovery of Cold-Rolled Polycarbonate, K. C. Rusch, *July, p. 288*
Uniaxial Extension of Polyvinyl Chloride in the High-Elastic State, G. V. Vinogradov, V. D. Fikhman and V. M. Alekseyeva, *September, p. 317*
Some Aspects of Orientation in Injection Molded Objects, J. L. S. Wales, Ir. J. Van Leeuwen and R. Van Der Vijgh, *September, p. 358*
The Macroscopic Volume Changes of Selected Polymers Subjected to Uniform Tensile Deformation, J. M. Powers and R. M. Caddell, *November, p. 432*
The Bending of Polymers Under Tension as Related to a Deep Drawing Process, W. B. Buettner, D. I. Marshall and J. A. Manson, *November, p. 409*

21. Degradation

Principles of Rotational Molding, M. A. Rao and J. L. Throne, *July, p. 237*
Kinetics of the Thermal Degradation of Poly(1,4-cyclohexylenedimethylene terephthalate), D. R. Gregory and M. T. Watson, *November, p. 454*

22. Density

Thermal Conductivity of Polyethylene: The Effects of Crystal Size, Density and Orientation on the Thermal Conductivity, D. Hansen and G. A. Bernier, *May, p. 204*
Evaluation of Melt Flow as a Measure of Low Density Polyethylene Processability into Blown Films, A. Plochocki and L. Czarnecki, *November, p. 459*

23. Diallyl Phthalate

Determination of Cure of Diallyl Phthalate Using Differential Scanning Calorimetry, P. E. Willard, *March, p. 120*

24. Differential Scanning Calorimetry

Characterization of Lubricants for Polyvinyl Chloride, L. F. King and F. Noel, *March, p. 112*
Determination of Cure of Diallyl Phthalate Using Differential Scanning Calorimetry, P. E. Willard, *March, p. 120*

25. Drawability

Deep Drawability of Biaxially Rolled Thermoplastic Sheets, L. J. Broutman, S. Kalpakjian and J. Chawla, *March, p. 150*
Analysis of Thermoplastic Cup Drawing, M. S. Warshavsky, *July, p. 277*
The Bending of Polymers Under Tension as Related to a Deep Drawing Process, W. B. Buettner, D. I. Marshall and J. A. Manson, *November, p. 409*

E

26. Ecology

The Potential for Reuse of Plastics Recovered from Solid Wastes, D. R. Paul, C. E. Vinson and C. E. Locke, *May, p. 157*

27. Elasticity

Rheological Behavior of Two-Phase Polymer Melts, C. D. Han and T. C. Yu, *March, p. 81*
Mechanical Properties of Particulate Composites, S. Sahu and L. J. Broutman, *March, p. 91*
Structure-Property Relationships of Chlorinated Polyethylenes, N. K. Kalfoglou and H. L. Williams, *May, p. 224*
Critical Regimes of Shear in Linear Polymers, G. V. Vinogradov, N. I. Insarova, B. B. Boiko and E. K. Borisenkova, *September, p. 323*

28. Electron Microprobe

Characterization of Polymer Composites by Electron Microprobe Analysis, S. S. Labana, H. K. Plummer and W. J. Burlant, *January, p. 34*

29. Electron Microscopy

Weathering Study of Glass-Fiber Reinforced Polyester Sheets by Scanning Electron Microscopy, A. Blaga, *January, p. 53*
Fusion of Particulate Structure in Polyvinyl Chloride During Powder Extrusion, T. Hattori, K. Tanaka and M. Matsuo, *May, p. 199*

30. Epoxy

Strength of Short-Fiber Reinforced Composites, R. E. Lavengood, *January, p. 48*
Mechanical Properties of Particulate Composites, S. Sahu and L. J. Broutman, *March, p. 91*
An Analysis of Fiber Buckling, R. M. Hackett, T. S. Tarpy, Jr. and J. L. Wood, *July, p. 272*

31. Extension

Uniaxial Extension of Polyvinyl Chloride in the High-Elastic State, G. V. Vinogradov, V. D. Fikhman and V. M. Alekseyeva, *September, p. 317*

32. Extruder

Solids Conveying in Screw Extruders. Part I. A Modified Isothermal Model, E. Broyer and Z. Tadmor, *January, p. 12*
Solids Conveying in Screw Extruders. Part II: Non Isothermal Model, Z. Tadmor and E. Broyer, *September, p. 378*
Solids Conveying in Screw Extruders. Part III: The Delay Zone, L. Kacir and Z. Tadmor, *September, p. 387*
Kinetics of the Thermal Degradation of Poly(1,4-cyclohexylenedimethylene terephthalate), D. R. Gregory and M. T. Watson, *November, p. 454*

33. Extrusion

Converging Flow of Polymer Melts in Extrusion Dies, F. N. Cogswell, *January, p. 64*
Melt Flow Instabilities in Capillary Flow of Two-Phase Polymer Melts, C. D. Han and R. R. Lamonte, *March, p. 77*
Solids Conveying in Screw Extruders. Part II: Non Isothermal Model, Z. Tadmor and E. Broyer, *September, p. 378*
Solids Conveying in Screw Extruders. Part III: The Delay Zone, L. Kacir and Z. Tadmor, *September, p. 387*
The Particle Flow of Polystyrene During Capillary Extrusion, K. S. Nielsen, *November, p. 416*
Evaluation of Melt Flow as a Measure of Low Density Polyethylene Processability into Blown Films, A. Plochocki and L. Czarnecki, *November, p. 459*

F

34. Fatigue Cracks

Growth of Fatigue Cracks in Polycarbonate, S. Arad, J. C. Radon and L. E. Culver, *May, p. 193*

35. Fiber

Breaking Energies of a Nylon Series Subjected to High-Speed Transverse Impact, A. F. Wilde, J. J. Ricca and J. M. Rogers, *January, p. 41*
Stability of Fiber Spinning of Power-Law Fluids, Y. T. Shah and J. R. A. Pearson, *May, p. 219*
An Analysis of Fiber Buckling, R. M. Hackett, T. S. Tarpy, Jr. and J. L. Wood, *July, p. 272*
Microfibers Within Fibers: A Review, P. Tucker and W. George, *September, p. 364*

36. Fillers

Characterization of Polymer Composites by Electron Microprobe Analysis, S. S. Labana, H. K. Plummer, and W. J. Burlant, *January, p. 34*
Mechanical Properties of Particulate Composites, S. Sahu and L. J. Broutman, *March, p. 91*

37. Film

Ultraviolet Depolymerization of Photoresist Polymers, D. A. Bolon and C. O. Kunz, *March, p. 109*
Positive and Negative Photoresist Applications of Thin Films Surface-Photopolymerized from Hexachlorobutadiene, C. O. Kunz, P. C. Long and A. N. Wright, *May, p. 209*
The Effect of Molecular Weight Distribution on Polyethylene Film Properties, P. J. Perron and P. B. Lederman, *September, p. 340*
Solids Conveying in Screw Extruders. Part III: The Delay Zone, L. Kacir and Z. Tadmor, *September, p. 387*
Evaluation of Melt Flow as a Measure of Low Density Polyethylene Processability into Blown Films, A. Plochocki and L. Czarnecki, *November, p. 459*

38. Flammability

Analysis of Volatile Combustion Products and a Study of Their Toxicological Effects, J. D. Seader, I. N. Einhorn, W. O. Drake and C. M. Mihlfeith, *March, p. 125*
Polyisocyanurate Foams, I. N. Einhorn, J. D. Seader, W. O. Drake, C. M. Mihlfeith and M. D. Kanakia, *May, p. 167*

39. Flexural Properties

Mechanical Properties of Particulate Composites, S. Sahu and L. J. Broutman, *March, p. 91*

40. Flow

Converging Flow of Polymer Melts in Extrusion Dies, F. N. Cogswell, *January, p. 64*

Critical Stress and Recoverable Shear for Polymer Melt Fracture, J. Vlachopoulos and M. Alam, *May, p. 184*

Principles of Rotational Molding, M. A. Rao and J. L. Throne, *July, p. 237*

The Injection Molding of Thermoplastics Part II: Experimental Test of the Model, M. R. Kamal and S. Kenig, *July, p. 302*

Critical Regimes of Shear in Linear Polymers, G. V. Vinogradov, N. I. Insarova, B. B. Boiko and E. K. Borisenkova, *September, p. 323*

Tensile Yield Energy in Glassy Polymers, C. W. Macosko and G. J. Brand, *November, p. 444*

Energy Transport to Molten Flowing Polymer Systems: I. Development of an Apparatus to Obtain Temperature Profiles, I. Saltuk, N. Siskovic and R. G. Griskey, *November, p. 397*

Energy Transport to Molten Flowing Polymer Systems: II. Analysis of Data and Development of Temperature Profiles with Axial Length, I. Saltuk, N. Siskovic and R. G. Griskey, *November, p. 402*

41. Foams

Analysis of Volatile Combustion Products and a Study of Their Toxicological Effects, J. D. Seader, I. N. Einhorn, W. O. Drake and C. M. Mihlfeith, *March, p. 125*

Polyisocyanurate Foams, I. N. Einhorn, J. D. Seader, W. O. Drake, C. M. Mihlfeith and M. D. Kanakia, *May, p. 167*

42. Fracture

Critical Stress and Recoverable Shear for Polymer Melt Fracture, J. Vlachopoulos and M. Alam, *May, p. 184*

Growth of Fatigue Cracks in Polycarbonate, S. Arad, J. C. Radon and L. E. Culver, *May, p. 193*

Fracture Mechanics and Relaxation Processes in Polyvinyl Chloride, J. C. Radon, *November, p. 425*

43. Fusion

Fusion of Particulate Structure in Polyvinyl Chloride During Powder Extrusion T. Hattori, K. Tanaka and M. Matsuo, *May, p. 199*

G

44. Gel Permeation Chromatography

Characterization of Polyvinyl Chloride Part III. An Alternative GPC Method for Measuring the Radii of Gyration, and the Degree of Long-Chain Branching of Polydispersed Polymers, R. K. S. Chan and C. Worman, *November, p. 437*

45. Glass Fiber

Weathering of Fibre Reinforced Plastics. Progress of Debonding Detected in Model Systems by Using Fibres as Light Pipes, S. Y. Field and K. H. G. Ashbee, *January, p. 30*

Strength of Short-Fiber Reinforced Composites, R. E. Lavengood, *January, p. 48*

Weathering Study of Glass-Fiber Reinforced Polyester Sheets by Scanning Electron Microscopy, A. Blaga, *January, p. 53*

H

46. Heat Transfer

Heat Transfer to Molten Polymers, O. M. Griffin, *March, p. 140*

Thermal Transport in the Contact Melting of Solids, O. M. Griffin, *July, p. 265*

Positive and Negative Photoresist Applications of Thin Films Surface-Photopolymerized from Hexachlorobutadiene, C. O. Kunz, P. C. Long and A. N. Wright, *May, p. 209*

48. Hot Stretching

Cold Rolled ABS. Part 2: Rubber Morphology and Tensile Properties of Hot Stretched and Cold Rolled ABS, M. R. Grancio, A. A. Bibeau and G. C. Claver, *November, p. 450*

I

49. Impact

Breaking Energies of a Nylon Series Subjected to High-Speed Transverse Impact, A. F. Wilde, J. J. Ricca, and J. M. Rogers, *January, p. 41*

50. Instability

Melt Flow Instabilities in Capillary Flow of Two-Phase Polymer Melts, C. D. Han and R. R. Lamonte, *March, p. 77*

Predicting Melt Flow Instability from a Criterion Based on the Behavior of Polymer Solutions, D. V. Boger and H. L. Williams, *July, p. 309*

51. Interfacial Tension

Surface and Interfacial Tension of Polymer Liquids—A Review, G. L. Gaines, Jr., *January, p. 1*

52. Interpenetration

Polybutadiene/Polystyrene Interpreting Polymer Networks, A. J. Curtius, M. J. Covitch, D. A. Thomas and L. H. Sperling, *March, p. 101*

53. Irradiation

Ultraviolet Depolymerization of Photoresist Polymers, D. A. Bolon and C. O. Kunz, *March, p. 109*

Positive and Negative Photoresist Applications of Thin Films Surface-Photopolymerized from Hexachlorobutadiene, C. O. Kunz, P. C. Long and A. N. Wright, *May, p. 209*

K

54. Kinetics

Determination of Cure of Diallyl Phthalate Using Differential Scanning Calorimetry, P. E. Willard, *March, p. 120*

On the Re-equilibration of Nylons, H. K. Reimschuessel and K. Nagasubramian, *May, p. 179*

Kinetics of the Thermal Degradation of Poly(1,4-cyclohexylenedimethylene terephthalate), D. R. Gregory and M. T. Watson, *November, p. 454*

L

55. Laser

Weathering of Fibre Reinforced Plastics. Progress of Debonding Detected in Model Systems by Using Fibres as Light Pipes, S. Y. Field and K. H. G. Ashbee, *January, p. 30*

56. Light Scattering

The Optical Properties of Two-Phase Polymer Systems: Single Scattering in Monodisperse, Non-Absorbing Systems, B. F. Conaghan and S. L. Rosen, *March, p. 134*

57. Liquid

Surface and Interfacial Tension of Polymer Liquids—A Review, G. L. Gaines, Jr., *January, p. 1*

Stability of Fiber Spinning of Power-Law Fluids, Y. T. Shah and J. R. A. Pearson, *May, p. 219*

58. Lubricants

Characterization of Lubricants for Polyvinyl Chloride, L. F. King and F. Noel, *March, p. 112*

Deep Drawability of Biaxially Rolled Thermoplastic Sheets, L. J. Broutman, S. Kalpakjian and J. Chawla, *March, p. 150*

M

59. Mechanical Properties

Low Temperature Dynamic Mechanical Properties of Polyurethane-Polyether Block Copolymers, J. L. Illinger, N. S. Schneider and F. E. Karasz, *January, p. 25*

Mechanical Properties of Particulate Composites, S. Sahu and L. J. Broutman, *March, p. 91*

Structure-Property Relationships of Chlorinated Polyethylenes, N. K. Kalfoglou and H. L. Williams, *May, p. 224*

An Analysis of Fiber Buckling, R. M. Hackett, T. S. Tarpy, Jr., and J. L Wood, *July, p. 272*

60. Melt

Surface and Interfacial Tension of Polymer Liquids—A Review, G. L. Gaines, Jr., *January, p. 1*

Melting Rates of Crystalline Polymers Under Shear Conditions, D. W. Sundstrom and C.-C. Young, *January, p. 59*

Converging Flow of Polymer Melts in Extrusion Dies, F. N. Cogswell, *January, p. 64*
Solids Conveying in Screw Extruders. Part III: The Delay Zone, L. Kacir and Z. Tadmor, *September, p. 387*
Energy Transport to Molten Flowing Polymer Systems: I. Development of an Apparatus to Obtain Temperature Profiles, I. Saltuk, N. Siskovic and R. G. Griskey, *November, p. 397*
Energy Transport to Molten Flowing Polymer Systems: II. Analysis of Data and Development of Temperature Profiles with Axial Length, I. Saltuk, N. Siskovic and R. G. Griskey, *November, p. 402*

61. Melt Flow

Melt Flow Instabilities in Capillary Flow of Two-Phase Polymer Melts, C. D. Han and R. R. Lamonte, *March, p. 77*
Rheological Behavior of Two-Phase Polymer Melts, C. D. Han and T. C. Yu, *March, p. 81*
Heat Transfer to Molten Polymers, O. M. Griffin, *March, p. 140*
Predicting Melt Flow Instability from a Criterion Based on the Behavior of Polymer Solutions, D. V. Boger and H. L. Williams, *July, p. 309*
The Particle Flow of Polystyrene During Capillary Extrusion, K. S. Nielsen, *November, p. 416*
Evaluation of Melt Flow as a Measure of Low Density Polyethylene Processability into Blown Films, A. Plochocki and L. Czarnecki, *November, p. 459*

62. Melt Fracture

Critical Stress and Recoverable Shear for Polymer Melt Fracture, J. Vlachopoulos and M. Alam, *May, p. 184*

63. Melting

Melting Rates of Crystalline Polymers Under Shear Conditions, D. W. Sundstrom and C.-C. Young, *January, p. 59*
Heat Transfer to Molten Polymers, O. M. Griffin, *March, p. 140*
Thermal Transport in the Contact Melting of Solids, O. M. Griffin, *July, p. 265*
The Injection Molding of Thermoplastics Part I: Theoretical Model, M. R. Kamal and S. Kenig, *July, p. 294*

64. Microfilms

Microfibers Within Fibers: A Review, P. Tucker and W. George, *September, p. 364*

65. Molding

Principles of Rotational Molding, M. A. Rao and J. L. Throne, *July, p. 237*
The Injection Molding of Thermoplastics Part I: Theoretical Model, M. R. Kamal and S. Kenig, *July, p. 294*
The Injection Molding of Thermoplastics Part II: Experimental Test of the Model, M. R. Kamal and S. Kenig, *July, p. 302*
Some Factors Influencing Cooling Rates of Rotationally Molded Parts, J. L. Throne, *September, p. 335*
Some Aspects of Orientation in Injection Molded Objects, J. L. S. Wales, Ir. J. Van Leeuwen and R. Van Der Vijgh, *September, p. 358*

66. Molecular Weight

On the Re-equilibration of Nylons, H. K. Reimschuessel and K. Nagasubramian, *May, p. 179*
The Effect of Molecular Weight Distribution on Polyethylene Film Properties, P. J. Perron and P. B. Lederman, *September, p. 340*
The Particle Flow of Polystyrene During Capillary Extrusion, K. S. Nielsen, *November, p. 416*

67. Morphology

Cold Rolled ABS. Part 2: Rubber Morphology and Tensile Properties of Hot Stretched and Cold Rolled ABS, M. R. Grancio, A. A. Bibeau and G. C. Claver, *November, p. 450*

N

68. Nylon

Breaking Energies of a Nylon Series Subjected to High-Speed Transverse Impact, A. F. Wilde, J. J. Ricca and J. M. Rogers, *January, p. 41*
On the Re-equilibration of Nylons, H. K. Reimschuessel and K. Nagasubramian, *May, p. 179*
Solids Conveying in Screw Extruders. Part II: Non Isothermal Model, Z. Tadmor and E. Broyer, *September, p. 378*
Solids Conveying in Screw Extruders. Part III: The Delay Zone, L. Kacir and Z. Tadmor, *September, p. 387*

O

69. Optical Properties

The Optical Properties of Two-Phase Polymer Systems: Single Scattering in Monodisperse, Non-Absorbing Systems, B. F. Conaghan and S. L. Rosen, *March, p. 134*

70. Orientation

Thermal Conductivity of Polyethylene: The Effects of Crystal Size, Density and Orientation on the Thermal Conductivity, D. Hansen and G. A. Bernier, *May, p. 204*

P

71. Particle Size

The Optical Properties of Two-Phase Polymer Systems: Single Scattering in Monodisperse, Non-Absorbing Systems, B. F. Conaghan and S. L. Rosen, *March, p. 134*
Cold Rolled ABS. Part I. The Effect of Rubber Particle Size on the Tensile Properties of ABS Before and After Cold Rolling, M. R. Grancio, *May, p. 213*

72. Photopolymerization

Positive and Negative Photoresist Applications of Thin Films Surface-Photopolymerized from Hexachlorobutadiene, C. O. Kunz, P. C. Long and A. N. Wright, *May, p. 209*

73. Photoresist Polymers

Ultraviolet Depolymerization of Photoresist Polymers, D. A. Bolon and C. O. Kunz, *March, p. 109*
Positive and Negative Photoresist Applications of Thin Films Surface-Photopolymerized from Hexachlorobutadiene, C. O. Kunz, P. C. Long and A. N. Wright, *May, p. 209*

74. Physical Properties

Breaking Energies of a Nylon Series Subjected to High-Speed Transverse Impact, A. F. Wilde, J. J. Ricca, and J. M. Rogers, *January, p. 41*
Polyisocyanurate Foams, I. N. Einhorn, J. D. Seader, W. O. Drake, C. M. Mihlfeith and M. D. Kanakia, *May, p. 167*
Some Factors Influencing Cooling Rates of Rotationally Molded Parts, J. L. Throne, *September, p. 335*
Solids Conveying in Screw Extruders. Part II: Non Isothermal Model, Z. Tadmor and E. Broyer, *September, p. 378*

75. Polyacrylonitrile

The Optical Properties of Two-Phase Polymer Systems: Single Scattering in Monodisperse, Non-Absorbing Systems, B. F. Conaghan and S. L. Rosen, *March, p. 134*

76. Polyarylsulfone

Tensile Yield Energy in Glassy Polymers, C. W. Macosko and G. J. Brand, *November, p. 444*

77. Polybutadiene

Polybutadiene/Polystyrene Interpenetrating Polymer Networks, A. J. Curtius, M. J. Covitch, D. A. Thomas and L. H. Sperling, *March, p. 101*
The Effectiveness of Polymer Additives as Determined by Torsional Braid Analysis, B. L. Williams, *July, p. 282*
Critical Regimes of Shear in Linear Polymers, G. V. Vinogradov, N. I. Insarova, B. B. Boiko and E. K. Borisenkova, *September, p. 323*

78. Polycarbonate

Deep Drawability of Biaxially Rolled Thermoplastic Sheets, L. J. Broutman, S. Kalpakjian and J. Chawla, *March, p. 150*
Growth of Fatigue Cracks in Polycarbonate, S. Arad, J. C. Radon and L. E. Culver, *May, p. 193*
Dimensional Recovery of Cold-Rolled Polycarbonate, K. C. Rusch, *July, p. 288*
The Elastic, Anelastic and Plastic Components of Strain in the Load-extension Curve for Bisphenol-A Polycarbonate, R. E. Robertson and A. M. Patel, *September, p. 346*
The Macroscopic Volume Changes of Selected Polymers Subjected to Uniform Tensile Deformation, J. M. Powers and R. M. Caddell, *November, p. 432*
Tensile Yield Energy in Glassy Polymers, C. W. Macosko and G. J. Brand, *November, p. 444*

79. Polychlorotrifluoroethylene

Solids Conveying in Screw Extruders. Part II: Non Isothermal Model, Z. Tadmor and E. Broyer, *September, p. 378*

80. Polyester

Characterization of Polymer Composites by Electron Microprobe Analysis, S. S. Labana, H. K. Plummer and W. J. Burlant, *January, p. 34*
Weathering Study of Glass-Fiber Reinforced Polyester Sheets by Scanning Electron Microscopy, A. Blaga, *January, p. 53*
Mechanical Properties of Particulate Composites, S. Sahu and L. J. Broutman, *March, p. 91*
Kinetics of the Thermal Degradation of Poly(1,4-cyclohexylenedimethylene terephthalate), D. R. Gregory and M. T. Watson, *November, p. 454*

81. Polyether

Low Temperature Dynamic Mechanical Properties of Polyurethane-Polyether Block Copolymers, J. L. Illinger, N. S. Schneider and F. E. Karasz, *January, p. 25*

82. Polyethylene

Melting Rates of Crystalline Polymers Under Shear Conditions, D. W. Sundstrom and C.-C. Young, *January, p. 59*
Converging Flow of Polymer Melts in Extrusion Dies, F. N. Cogswell, *January, p. 64*
Melt Flow Instabilities in Capillary Flow of Two-Phase Polymer Melts, C. D. Han and R. R. Lamonte, *March, p. 77*
Rheological Behavior of Two-Phase Polymer Melts, C. D. Han and T. C. Yu, *March, p. 81*
Heat Transfer to Molten Polymers, O. M. Griffin, *March, p. 140*
The Potential for Reuse of Plastics Recovered from Solid Wastes, D. R. Paul, C. E. Vinson and C. E. Locke, *May, p. 157*
Critical Stress and Recoverable Shear for Polymer Melt Fracture, J. Vlachopoulos and M. Alam, *May, p. 184*
Thermal Conductivity of Polyethylene: The Effects of Crystal Size, Density and Orientation on the Thermal Conductivity, D. Hansen and G. A. Bernier, *May, p. 204*
Structure-Property Relationships of Chlorinated Polyethylenes, N. K. Kalfoglou and H. L. Williams, *May, p. 224*
The Injection Molding of Thermoplastics Part II: Experimental Test of the Model, M. R. Kamal and S. Kenig, *July, p. 302*
Predicting Melt Flow Instability from a Criterion Based on the Behavior of Polymer Solutions, D. V. Boger and H. L. Williams, *July, p. 309*
The Effect of Molecular Weight Distribution on Polyethylene Film Properties, P. J. Perron and P. B. Lederman, *September, p. 340*
Solids Conveying in Screw Extruders. Part II. Non Isothermal Model, Z. Tadmor and E. Broyer, *September, p. 378*
Solids Conveying in Screw Extruders. Part III: The Delay Zone, L. Kacir and Z. Tadmor, *September, p. 387*
Energy Transport to Molten Flowing Polymer Systems: I. Development of an Apparatus to Obtain Temperature Profiles, I. Saltuk, N. Siskovic and R. G. Griskey, *November, p. 397*
Energy Transport to Molten Flowing Polymer Systems: II. Analysis of Data and Development of Temperature Profiles with Axial Length, I. Saltuk, N. Siskovic and R. G. Griskey, *November, p. 402*
The Macroscopic Volume Changes of Selected Polymers Subjected to Uniform Tensile Deformation, J. M. Powers and R. M. Caddell, *November, p. 432*
Evaluation of Melt Flow as a Measure of Low Density Polyethylene Processability into Blown Films, A. Plochocki and L. Czarnecki, *November, p. 459*

83. Polyisocyanurate

Polyisocyanurate Foams, I. N. Einhorn, J. D. Seader, W. O. Drake, C. M. Mihlfeith and M. D. Kanakia, *May, p. 167*

84. Polyisoprene

The Optical Properties of Two-Phase Polymer Systems: Single Scattering in Monodisperse, Non-Absorbing Systems, B. F. Conaghan and S. L. Rosen, *March, p. 134*

85. Polymer Blend

Melt Flow Instabilities in Capillary Flow of Two-Phase Polymer Melts, C. D. Han and R. R. Lamonte, *March, p. 77*
Rheological Behavior of Two-Phase Polymer Melts, C. D. Han and T. C. Yu, *March, p. 81*

86. Polymer Networks

Polybutadiene/Polystyrene Interpenetrating Polymer Networks, A. J. Curtius, M. J. Covitch, D. A. Thomas and L. H. Sperling, *March, p. 101*

87. Polymethylmethacrylate

The Macroscopic Volume Changes of Selected Polymers Subjected to Uniform Tensile Deformation, J. M. Powers and R. M. Caddell, *November, p. 432*
Tensile Yield Energy in Glassy Polymers, C. W. Macosko and G. J. Brand, *November, p. 444*
Strain Ratio and Volume Change During Tension and Compression Creep of Thermoplastics, P. J. Mallon, D. McCammond and P. P. Benham, *November, p. 420*

88. Polyoxymethylene

Heat Transfer to Molten Polymers, O. M. Griffin, *March, p. 140*

89. Polypropylene

Converging Flow of Polymer Melts in Extrusion Dies, F. N. Cogswell, *January, p. 64*
Critical Stress and Recoverable Shear for Polymer Melt Fracture, J. Vlachopoulos and M. Alam, *May, p. 184*
Solids Conveying in Screw Extruders. Part III: The Delay Zone, L. Kacir and Z. Tadmor, *September, p. 387*
Strain Ratio and Volume Change During Tension and Compression Creep of Thermoplastics, P. J. Mallon, D. McCammond and P. P. Benham, *November, p. 420*

90. Polystyrene

Melt Flow Instabilities in Capillary Flow of Two-Phase Polymer Melts, C. D. Han and R. R. Lamonte, *March, p. 77*
Rheological Behavior of Two-Phase Polymer Melts, C. D. Han and T. C. Yu, *March, p. 81*
Polybutadiene/Polystyrene Interpenetrating Polymer Networks, A. J. Curtius, M. J. Covitch, D. A. Thomas and L. H. Sperling, *March, p. 101*
The Potential for Reuse of Plastics Recovered from Solid Wastes, D. R. Paul, C. E. Vinson and C. E. Locke, *May, p. 157*
Critical Stress and Recoverable Shear for Polymer Melt Fracture, J. Vlachopoulos and M. Alam, *May, p. 184*
Principles of Rotational Molding, M. A. Rao and J. L. Throne, *July, p. 237*
Predicting Melt Flow Instability from a Criterion Based on the Behavior of Polymer Solutions, D. V. Boger and H. L. Williams, *July, p. 309*
Some Factors Influencing Cooling Rates of Rotationally Molded Parts, J. L. Throne, *September, p. 335*
Some Aspects of Orientation in Injection Molded Objects, J. L. S. Wales, Ir. J. Van Leeuwen and R. Van Der Vijgh, *September, p. 358*
The Particle Flow of Polystyrene During Capillary Extrusion, K. S. Nielsen, *November, p. 416*

91. Polysulfone

Tensile Yield Energy in Glassy Polymers, C. W. Macosko and G. J. Brand, *November, p. 444*

92. Polyurethane

Low Temperature Dynamic Mechanical Properties of Polyurethane-Polyether Block Copolymers, J. L. Illinger, N. S. Schneider, and F. E. Karasz, *January, p. 25*

93. Polyvinyl Acetate

Characterization of Polyvinyl Chloride Part III. An Alternative GPC Method for Measuring the Radii of Gyration, and the Degree of Long-Chain Branching of Polydispersed Polymers, R. K. S. Chan and C. Worman, *November, p. 437*

94. Polyvinyl Chloride

Characterization of Lubricants for Polyvinyl Chloride, L. F. King and F. Noel, *March, p. 112*
Deep Drawability of Biaxially Rolled Thermoplastic Sheets, L. J. Broutman, S. Kalpakjian and J. Chawla, *March, p. 150*
The Potential for Reuse of Plastics Recovered from Solid Wastes, D. R. Paul, C. E. Vinson and C. E. Locke, *May, p. 157*
Fusion of Particulate Structure in Polyvinyl Chloride During Powder Extrusion, T. Hattori, K. Tanaka and M. Matsuo, *May, p. 199*
Uniaxial Extension of Polyvinyl Chloride in the High-Elastic State, G. V. Vinogradov, V. D. Fikhman and V. M. Alekseyeva, *September, p. 317*
Solids Conveying in Screw Extruders. Part II: Non Isothermal Model, Z. Tadmor and E. Broyer, *September, p. 378*
Solids Conveying in Screw Extruders. Part III: The Delay Zone, L. Kacir and Z. Tadmor, *September, p. 387*

Characterization of Polyvinyl Chloride Part III. An Alternative GPC Method for Measuring the Radii of Gyration and the Degree of Long-Chain Branching of Polydispersed Polymers, R. K. S. Chan and C. Worman, *November, p. 437*

Tensile Yield Energy in Glassy Polymers, C. W. Macosko and G. J. Brand, *November, p. 444*

Fracture Mechanics and Relaxation Processes in Polyvinyl Chloride, J. C. Radon, *November, p. 425*

The Bending of Polymers Under Tension as Related to a Deep Drawing Process, W. B. Buettner, D. I. Marshall and J. A. Manson, *November, p. 409*

Strain Ratio and Volume Change During Tension and Compression Creep of Thermoplastics, P. J. Mallon, D. McCammond, and P. P. Benham, *November, p. 420*

95. Power Requirement

Solids Conveying in Screw Extruders. Part I. A Modified Isothermal Model, E. Broyer and Z. Tadmor, *January, p. 12*

96. Pressure Dependence

Solids Conveying in Screw Extruders. Part I. A Modified Isothermal Model, E. Broyer and Z. Tadmor, *January, p. 12*

Melt Flow Instabilities in Capillary Flow of Two-Phase Polymer Melts, C. D. Han and R. R. Lamonte, *March, p. 77*

Rheological Behavior of Two-Phase Polymer Melts, C. D. Han and T. C. Yu, *March, p. 81*

The Injection Molding of Thermoplastics Part II: Experimental Test of the Model, M. R. Kamal and S. Kenig, *July, p. 302*

97. Processing

Characterization of Lubricants for Polyvinyl Chloride, L. F. King and F. Noel, *March, p. 112*

Prediction of Polymer Processing Characteristics Using the C. W. Brabender Plasti-corder Torque Rheometer, E. O. Allen II and R. F. Williams, Jr., *September, p. 353*

Evaluation of Melt Flow as a Measure of Low Density Polyethylene Processability into Blown Films, A. Plochocki and L. Czarnecki, *November, p. 459*

98. Pyrolysis

Polyisocyanurate Foams, I. N. Einhorn, J. D. Seader, W. O. Drake, C. M. Mihlfeith and M. D. Kanakia, *May, p. 167*

R

99. Radius of Gyration

Characterization of Polyvinyl Chloride Part III. An Alternative GPC Method for Measuring the Radii of Gyration, and the Degree of Long-Chain Branching of Polydispersed Polymers, R. K. S. Chan and C. Worman, *November, p. 437*

100. Recycling

The Potential for Reuse of Plastics Recovered from Solid Wastes, D. R. Paul, C. E. Vinson and C. E. Locke, *May, p. 157*

101. Re-equilibration

On the Re-equilibration of Nylons, H. K. Reimschuessel and K. Nagasubramian, *May, p. 179*

102. Reinforced Plastics

Weathering of Fibre Reinforced Plastics. Progress of Debonding Detected in Model Systems by Using Fibres as Light Pipes, S. Y. Field and K. H. G. Ashbee, *January, p. 30*

Weathering Study of Glass-Fiber Reinforced Polyester Sheets by Scanning Electron Microscopy, A. Blaga, *January, p. 53*

103. Review

Surface and Interfacial Tension of Polymer Liquids—A Review, G. L. Gaines, Jr., *January, p. 1*

Microfibers Within Fibers: A Review, P. Tucker and W. George, *September, p. 364*

104. Rheology

Melt Flow Instabilities in Capillary Flow of Two-Phase Polymer Melts, C. D. Han and R. R. Lamonte, *March, p. 77*

Rheological Behavior of Two-Phase Polymer Melts, C. D. Han and T. C. Yu, *March, p. 81*

The Effect of Molecular Weight Distribution on Polyethylene Film Properties, P. J. Perron and P. B. Lederman, *September, p. 340*

Some Aspects of Orientation in Injection Molded Objects, J. L. S. Wales and Ir. J. Van Leeuwen and R. Van Der Vijgh, *September, p. 358*

Evaluation of Melt Flow as a Measure of Low Density Polyethylene Processability into Blown Films, A. Plochocki and L. Czarnecki, *November, p. 459*

105. Rheometer

Rheological Behavior of Two-Phase Polymer Melts, C. D. Han and T. C. Yu, *March, p. 81*

106. Rubber

Characterization of Polymer Composites by Electron Microprobe Analysis, S. S. Labana, H. K. Plummer and W. J. Burlant, *January, p. 34*

Cold Rolled ABS. Part 2: Rubber Morphology and Tensile Properties of Hot Stretched and Cold Rolled ABS, M. R. Grancio, A. A. Bibeau and G. C. Claver, *November, p. 450*

S

107. Shear

Melting Rates of Crystalline Polymers Under Shear Conditions, D. W. Sundstrom and C.-C. Young, *January, p. 59*

Melt Flow Instabilities in Capillary Flow of Two-Phase Polymer Melts, C. D. Han and R. R. Lamonte, *March, p. 77*

Rheological Behavior of Two-Phase Polymer Melts, C. D. Han and T. C. Yu, *March, p. 81*

Critical Stress and Recoverable Shear for Polymer Melt Fracture, J. Vlachopoulos and M. Alam, *May, p. 184*

Fusion of Particulate Structure in Polyvinyl Chloride During Powder Extrusion, T. Hattori, K. Tanaka and M. Matsuo, *May, p. 199*

Predicting Melt Flow Instability from a Criterion Based on the Behavior of Polymer Solutions, D. V. Boger and H. L. Williams, *July, p. 309*

Critical Regimes of Shear in Linear Polymers, G. V. Vinogradov, N. I. Insarova, B. B. Boiko and E. K. Borisenkova, *September, p. 323*

Some Aspects of Orientation in Injection Molded Objects, J. L. S. Wales, Ir. J. Van Leeuwen and R. Van Der Vijgh, *September, p. 358*

The Particle Flow of Polystyrene During Capillary Extrusion, K. S. Nielsen, *November, p. 416*

108. Sheet

Deep Drawability of Biaxially Rolled Thermoplastic Sheets, L. J. Broutman, S. Kalpakjian and J. Chawla, *March, p. 150*

109. Spinning

Stability of Fiber Spinning of Power-Law Fluids, Y. T. Shah and J. R. A. Pearson, *May, p. 219*

Analysis of Thermoplastic Cup Drawing, M. S. Warshavsky, *July, p. 277*

110. Stability

Stability of Fiber Spinning of Power-Law Fluids, Y. T. Shah and J. R. A. Pearson, *May, p. 219*

Prediction of Polymer Processing Characteristics Using the C. W. Brabender Plasti-corder Torque Rheometer, E. O. Allen II and R. F. Williams, Jr., *September, p. 353*

111. Stress-Strain

Breaking Energies of a Nylon Series Subjected to High-Speed Transverse Impact, A. F. Wilde, J. J. Ricca and J. M. Rogers, *January, p. 41*

Strength of Short-Fiber Reinforced Composites, R. E. Lavengood, *January, p. 48*

Melting Rates of Crystalline Polymers Under Shear Conditions, D. W. Sundstrom and C.-C. Young, *January, p. 59*

Melt Flow Instabilities in Capillary Flow of Two-Phase Polymer Melts, C. D. HAN and R. R. Lamonte, *March, p. 77*

Mechanical Properties of Particulate Composites, S. Sahu and L. J. Broutman, *March, p. 91*

Polybutadiene/Polystyrene Interpenetraing Polymer Networks, A. J. Curtius, M. J. Covitch, D. A. Thomas and L. H. Sperling, *March, p. 101*

Deep Drawability of Biaxially Rolled Thermoplastic Sheets, L. J. Broutman, S. Kalpakjian and J. Chawla, *March, p. 150*

Critical Stress and Recoverable Shear for Polymer Melt Fracture, J. Vlachopoulos and M. Alam, *May, p. 184*

Cold Rolled ABS. Part I: The Effect of Rubber Particle Size on the Tensile Properties of ABS Before and After Cold Rolling, M. R. Grancio, *May, p. 213*

Structure-Property Relationships of Chlorinated Polyethylenes, N. K. Kalfoglou and H. L. Williams, *May, p. 224*

An Analysis of Fiber Buckling, R. M. Hackett, T. S. Tarpy, Jr., and J. L. Wood, *July, p. 272*

Dimensional Recovery of Cold-Rolled Polycarbonate, K. C. Rusch, *July, p. 288*
Uniaxial Extension of Polyvinyl Chloride in the High-Elastic State, G. V. Vinogradov, V. D. Fikhman and V. M. Alekseyeva, *September, p. 317*
The Elastic, Anelastic and Plastic Components of Strain in the Load-extension Curve for Bisphenol-A Polycarbonate, R. E. Robertson and A. M. Patel, *September, p. 346*
The Macroscopic Volume Changes of Selected Polymers Subjected to Uniform Tensile Deformation, J. M. Powers and R. M. Caddell, *November, p. 432*
Tensile Yield Energy in Glassy Polymers, C. W. Macosko and G. J. Brand, *November, p. 444*
Cold Rolled ABS. Part 2: Rubber Morphology and Tensile Properties of Hot Stretched and Cold Rolled ABS, M. R. Grancio, A. A. Bibeau and G. C. Claver, *November, p. 450*
Fracture Mechanics and Relaxation Processes in Polyvinyl Chloride, J. C. Radon, *November, p. 425*
The Bending of Polymers Under Tension as Related to a Deep Drawing Process, W. B. Buettner, D. I. Marshall and J. A. Manson, *November, p. 409*
Strain Ratio and Volume Change During Tension and Compression Creep of Thermoplastics, P. J. Mallon, D. McCammond, and P. P. Benham, *November, p. 420*

112. Surface Tension

Surface and Interfacial Tension of Polymer Liquids—A Review, G. L. Gaines, Jr., *January, p. 1*

T

113. Temperature Dependence

Surface and Interfacial Tension of Polymer Liquids—A Review, G. L. Gaines, Jr., *January, p. 1*
Low Temperature Dynamic Mechanical Properties of Polyurethane-Polyether Block Copolymers, J. L. Illinger, N. S. Schneider and F. E. Karasz, *January, p. 25*
Polybutadiene/Polystyrene Interpenetrating Polymer Networks, A. J. Curtius, M. J. Covitch, D. A. Thomas and L. H. Sperling, *March, p. 101*
Characterization of Lubricants for Polyvinyl Chloride, L. F. King, and F. Noel, *March, p. 112*
Determination of Cure of Diallyl Phthalate Using Differential Scanning Calorimetry, P. E. Willard, *March, p. 120*
Heat Transfer to Molten Polymers, O. M. Griffin, *March, p. 140*
Fusion of Particulate Structure in Polyvinyl Chloride During Powder Extrusion, T. Hattori, K. Tanaka and M. Matsuo, *May, p. 199*
Stability of Fiber Spinning of Power-Law Fluids, Y. T. Shah and J. R. A. Pearson, *May, p. 219*
Structure-Property Relationships of Chlorinated Polyethylenes, N. K. Kalfoglou and H. L. Williams, *May, p. 224*
Dimensional Recovery of Cold-Rolled Polycarbonate, K. C. Rusch, *July, p. 288*
The Injection Molding of Thermoplastics Part I: Theoretical Model, M. R. Kamal and S. Kenig, *July, p. 294*
The Injection Molding of Thermoplastics Part II: Experimental Test of the Model, M. R. Kamal and S. Kenig, *July, p. 302*
Predicting Melt Flow Instability from a Criterion Based on the Behavior of Polymer Solutions, D. V. Boger and H. L. Williams, *July, p. 309*
Prediction of Polymer Processing Characteristics Using the C. W. Brabender Plasti-corder Torque Rheometer, E. O. Allen II and R. F. Williams, Jr., *September, p. 353*
Some Aspects of Orientation in Injection Molded Objects, J. L. S. Wales, Ir. J. Van Leeuwen and R. Van Der Wijgh, *September, p. 358*
Solids Conveying in Screw Extruders. Part II: Non Isothermal Model, Z. Tadmor and E. Broyer, *September, p. 378*
Solids Conveying in Screw Extruders. Part III: The Delay Zone, L. Kacir and Z. Tadmor, *September, p. 387*
Tensile Yield Energy in Glassy Polymers, C. W. Macosko and G. J. Brand, *November, p. 444*
Kinetics of the Thermal Degradation of Poly(1,4-cyclohexylenedimethylene terephthalate), D. R. Gregory and M. T. Watson, *November, p. 454*
Fracture Mechanics and Relaxation Processes in Polyvinyl Chloride, J. C. Radon, *November, p. 425*

114. Temperature Profiles

Energy Transport to Molten Flowing Polymer Systems: I. Development of an Apparatus to Obtain Temperature Profiles, I. Saltuk, N. Siskovic and R. G. Griskey, *November, p. 397*
Energy Transport to Molten Flowing Polymer Systems: II. Analysis of Data and Development of Temperature Profiles with Axial Length, I. Saltuk, N. Siskovic and R. G. Griskey, *November, p. 402*

115. Tensile Properties

Strength of Short-Fiber Reinforced Composites, R. E. Lavengood, *January, p. 48*
Mechanical Properties of Particulate Composites, S. Sahu and L. J. Broutman, *March, p. 91*
Polybutadiene/Polystyrene Interpenetrating Polymer Networks, A. J. Curtius, M. J. Covitch, D. A. Thomas and L. H. Sperling, *March, p. 101*
Cold Rolled ABS, Part I: The Effect of Rubber Particle Size on the Tensile Properties of ABS Before and After Cold Rolling, M. R. Grancio, *May, p. 213*
Principles of Rotational Molding, M. A. Rao and J. L. Throne, *July, p. 237*
The Elastic, Anelestic and Plastic Components of Strain in the Load-extension Curve for Bisphenol-A Polycarbonate, R. E. Robertson and A. M. Patel, *September, p. 346*
Tensile Yield Energy in Glassy Polymers, C. W. Macosko and G. H. Brand, *November, p. 444*
Cold Rolled ABS. Part 2: Rubber Morphology and Tensile Properties of Hot Stretched and Cold Rolled ABS, M. R. Grancio, A. A. Bibeau and G. C. Claver, *November, p. 450*
Fracture Mechanics and Relaxation Processes in Polyvinyl Chloride, J. C. Radon, *November, p. 425*
The Bending of Polymers Under Tension as Related to a Deep Drawing Process, W. B. Buettner, D. I. Marshall and J. A. Manson, *November, p. 409*

116. Theoretical Model

Solids Conveying in Screw Extruders. Part I. A Modified Isothermal Model, E. Broyer and Z. Tadmor, *January, p. 12*
The Injection Molding of Thermoplastics Part I: Theoretical Model, M. R. Kamal and S. Kenig, *July, p. 294*
Some Factors Influencing Cooling Rates of Rotationally Molded Parts, J. L. Throne, *September, p. 335*
Solids Conveying in Screw Extruders. Part II: Non Isothermal Model, Z. Tadmor and E. Broyer, *September, p. 378*
Solids Conveying in Screw Extruders. Part III: The Delay Zone, L. Kacir and Z. Tadmor, *September, p. 387*

117. Thermal Conductivity

Thermal Conductivity of Polyethylene: The Effects of Crystal Size, Density and Orientation on the Thermal Conductivity, D. Hansen, and G. A. Bernier, *May, p. 204*

118. Thermochemical Properties

Analysis of Volatile Combustion Products and a Study of Their Toxicological Effects, J. D. Seader, J. N. Einhorn, W. O. Drake and C. M. Mihlfeith, *March, p. 125*
Polyisocyanurate Foams, I. N. Einhorn, J. D. Seader, W. O. Drake, C. M. Mihlfeith and M. D. Kanakia, *May, p. 167*

119. Thermoplastics

Melting Rates of Crystalline Polymers Under Shear Conditions, D. W. Sundstrom and C.-C. Young, *January, p. 59*
Deep Drawability of Biaxially Rolled Thermoplastic Sheets, L. J. Broutman, S. Kalpakjian and J. Chawla, *March, p. 150*
Analysis of Thermoplastic Cup Drawing, M. S. Warshavsky, *July, p. 277*
The Injection Molding of Thermoplastics Part I: Theoretical Model, M. R. Kamal and S. Kenig, *July, p. 294*
The Injection Molding of Thermoplastics Part II: Experimental Test of the Model, M. R. Kamal and S. Kenig, *July, p. 302*
Prediction of Polymer Processing Characteristics Using the C. W. Brabender Plasti-corder Torque Rheometer, E. O. Allen II and R. F. Williams, Jr., *September, p. 353*
Strain Ratio and Volume Change During Tension and Compression Creep of Thermoplastics, P. J. Mallon, D. McCammond, and P. P. Benham, *November, p. 420*

120. Time Dependence

The Effectiveness of Polymer Additives as Determined by Torsional Braid Analysis, B. L. Williams, *May, p. 282*

Uniaxial Extension of Polyvinyl Chloride in the High-Elastic State, G. V. Vinogradov, V. D. Fikhman and V. M. Alekseyeva, *September, p. 317*
Strain Ratio and Volume Change During Tension and Compression Creep of Thermoplastics, P. J. Mallon, D. McCammond, and P. P. Benham, *November, p. 420*

121. Torsional Braid Analysis
The Effectiveness of Polymer Additives as Determined by Torsional Braid Analysis, B. L. Williams, *July, p. 282*

122. Toughness
Fracture Mechanics and Relaxation Processes in Polyvinyl Chloride, J. C. Radon, *November, p. 425*

123. Toxicological Properties
Analysis of Volatile Combustion Products and a Study of Their Toxicological Effects, J. D. Seader, I. N. Einhorn, W. O. Drake and C. M. Mihlfeith, *March, p. 125*

V

124. Viscosity
Surface and Interfacial Tension of Polymer Liquids—A Review, G. L. Gaines, Jr., *January, p. 1*
Melt Flow Instabilities in Capillary Flow of Two-Phase Polymer Melts, C. D. Han and R. R. Lamonte, *March, p. 77*
Rheological Behavior of Two-Phase Polymer Melts, C. D. Han and T. C. Yu, *March, p. 81*
Stability of Fiber Spinning of Power-Law Fluids, Y. T. Shah and J. R. A. Pearson, *May, p. 219*
The Injection Molding of Thermoplastics Part I: Theoretical Model, M. R. Kamal and S. Kenig, *July, p. 294*
Critical Regimes of Shear in Linear Polymers, G. V. Vinogradov, N. I. Insarova, B. B. Boiko and E. K. Borisenkova, *September, p. 323*
Kinetics of the Thermal Degradation of Poly(1,4-cyclohexylenedimethylene terephthalate), D. R. Gregory and M. T. Watson, *November, p. 454*
Evaluation of Melt Flow as a Measure of Low Density Polyethylene Processability into Blown Films, A. Plochocki and L. Czarnecki, *November, p. 459*

125. Volume Change
The Macroscopic Volume Changes of Selected Polymers Subjected to Uniform Tensile Deformation, J. M. Powers and R. M. Caddell, *November, p. 432*

W

126. Waste
The Potential for Reuse of Plastics Recovered from Solid Wastes, D. R. Paul, C. E. Vinson and C. E. Locke, *May, p. 157*

127. Weathering
Weathering Study of Glass-Fiber Reinforced Polyester Sheets by Scanning Electron Microscopy, A. Blaga, *January, p. 53*

Y

128. Yield Energy
Tensile Yield Energy in Glassy Polymers, C. W. Macosko and G. J. Brand, *November, p. 444*
